Re: Barry P. Lunderville
WMOU (AM), Berlin, New Hampshire
Facility Identification Number: 48404
Special Temporary Authority

Dear Mr. Lunderville:

This is in reference to the request filed March 30, 2011, on behalf of Barry P. Lunderville ("BPL"). BPL requests extension of the special temporary authority ("STA") granted on August 27, 2010, to operate Station WMOU with a long wire antenna from the nearby site of commonly-owned Station WKDR¹. In support of the request, BPL states that it is in the process of having a diplexing circuit designed, and that the project has been delayed by adverse winter weather conditions.²

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WMOU may operate with the following facilities:

| | |
|------------------------|---|
| Geographic coordinates | 44° 28' 58" N, 71° 10' 38" W (NAD 1927) |
| Frequency | 1230 KHz |
| Hours of operation | Unlimited |

¹ WMOU is licensed for operation on 1230 kHz with 1 kilowatt daytime and 1 kilowatt nighttime, employing a nondirectional antenna (ND-1-U).

² However, our records do not indicate that an application for construction permit, necessary for permanent relocation of the station to the WKDR site, has been filed.

| | |
|--------------------|--------------------|
| Operating power | Not to exceed 1 kW |
| Antenna type | Horizontal wire |
| Antenna efficiency | 241 mV/m/km/kW |
| Overall height | 6 meters (20 ft.) |

It will be necessary to further reduce power or cease operation if complaints of interference are received. It is anticipated that an application for construction permit will be filed prior to the expiration date below. BPL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **November 17, 2011**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
